P.O. BOX 323

VERNON, INDIANA 47282

(812) 352-3024 / (812) 352-3030

Kathryn Nicely:

This letter is to provide justification on the Local Health Maintenance roll over Funds. The basic service area is Communicable Disease – objective: is to decrease the amount of Communicable Diseases during the time of our community events by providing portable hand washing stations.

The target population is residents and visitors from surrounding areas visiting our local community events: Jennings County Fair, North Vernon Summerfest, Vernon Days, and Commiskey Fall Festival. The local events service approximately 30,000 people throughout the year.

In 2010 we have had one individual hospitalization confirmed and nine unofficial hospitalizations, that were related to communicable diseases during our local County Fair. At this event the environment is favorable for developing communicable diseases by handling animals and then ingesting food and not having adequate facilities to wash their hands. Children are more accessible to the dangers of the diseases. All ages are at risk because hands are generally used to consume certain food items, such as: Nacho & Cheese, popcorn, ice cream cones, hot dogs, sandwiches, etc.

The Indiana State Department of Health encourages hand washing as a great defense against preventing illnesses, infections and diseases. The recommended guidelines of when hands should always be washed is: after coughing, sneezing, after using the bathroom, before preparing or eating food, before and after changing a diaper, before and after any contact with someone who is ill or injured, after touching an animal or animal waste, and after household chores or yard work. Having adequate hand washing facilities in needed locations, example near portable toilets and farm animal barns, will help decrease the amount of these following diseases, Norovirus Gastroenteritis, influenza, staph infections, community acquired MRSA and hemorrhagic uremic syndrome (HUS).

Providing the local events with additional hand washing facilities we will decrease the amount of illnesses and provide safety for our food operators, 4- H participants, residents and visitors who attend. Attached is a detailed quote of services for each community event that will be provided by Best Way Disposal. Services will include portable hand washing units, soap, water, and disposal towels.

Thank you for keeping our local community safe and free of communicable diseases.
Prevention is the key to a healthy and safe community.

Respectfully,

Jennings County Health Department
